MEDLINE via PubMed

MEDLINE é uma base de dados da literatura internacional da área médica e biomédica, produzida pela NLM (National Library of Medicine, USA) e que **contêm referências bibliográficas e resumos de mais de 5.000 títulos de revistas publicadas nos Estados Unidos e em outros 70 países**. Contêm referências de artigos e as revisões sistemáticas da base Biblioteca Cochrane.
Disponibilizada desde 1966

MEDLINE via PubMed - www.pubmed.org Base da NLM (National Library of Medicine) contém referências bibliográficas e resumos de periódicos da literatura biomédica mundial. **A MedLine é o maior componente do PubMed e principal base de dados da National Library of Medicine (NLM). Contêm mais de 17 milhões de referências de aproximadamente 5.400 periódicos biomédicos publicados nos Estados Unidos e em mais 80 países.** Cobre o período de 1948 até o presente. A maioria dos registros é proveniente de fontes na língua inglesa (cerca de 90%) e todos os resumos estão em inglês

- Schizophrenia
1. A severe emotional disorder of psychotic depth characteristically marked by a retreat from reality with delusion formation, HALLUCINATIONS, emotional disharmony, and regressive behavior.
Schizophrenia Spectrum and Other Psychotic Disorders
2. Marked disorders of thought (delusions, hallucinations, or other thought disorder accompanied by disordered affect or behavior), and deterioration from a previous level of functioning.
Schizophrenia, Paranoid
3. A chronic form of schizophrenia characterized primarily by the presence of persecutory or grandiose delusions, often associated with hallucination.
Schizophrenia, Disorganized
4. A type of schizophrenia characterized by frequent incoherence; marked loosening of associations, or grossly disorganized behavior and flat or grossly inappropriate affect that does not meet the criteria for the catatonic type; associated features include extreme social withdrawal, grimacing, mannerisms, mirror gazing, inappropriate giggling, and other odd behavior.
Schizophrenia, Childhood
